PROFESSIONAL SUMMARY

Senior Software Engineer with nearly 3 years of professional experience in software development, specializing in Java backend and full-stack application development. Experienced in designing and developing RESTful APIs and enterprise applications using Java, Spring Boot, Microservices, and React.js. Skilled in implementing JWT-based authentication, writing unit tests using JUnit and Mockito, and working with Docker and AWS infrastructure. Experienced in backend modernization, enterprise application development, client collaboration, and cross-functional team environments.

PROFESSIONAL EXPERIENCE

Senior Software Engineer 04/2024
Happiest Minds Technologies Bengaluru, India
Contributed to developing enterprise applications from the ground up, gaining experience in both frontend and backend development. Transitioned from frontend development to backend-focused responsibilities while working on client projects, collaborating with cross-functional teams, and delivering reliable software solutions.

Freelance Technical Trainer 01/2024 – 04/2024
Bytexl Vadodara, Gujarat
Delivered programming training to approximately 250 college students, focusing on C programming, Core Java, and Object-Oriented Programming concepts. Developed strong technical communication and knowledge-sharing skills while helping students understand programming fundamentals.

Front-End Developer 06/2022 – 11/2022
My Company Visakhapatnam, India
Worked as a front-end development intern, contributing to the development of user-friendly web applications. Gained practical experience in building application interfaces, creating responsive layouts, and improving user experience through frontend development.

EDUCATION

Bachelor of Technology 2019 – 2023
GMRIT Rajam, India
Graduated in Information Technology from GMR IT, Rajam, AP.

SKILLS & TECHNOLOGIES

Programming Languages:
Java, JavaScript, SQL, Python

Frontend Development:
React.js, HTML5, CSS3, Bootstrap

Security & Testing:
Spring Security, JWT Authentication, JUnit, Mockito

Development Tools:
Postman, Swagger, Jira, OpenMetadata

Backend Development:
Spring Boot, Spring MVC, Microservices, RESTful APIs

Databases:
MySQL, MongoDB

Cloud & DevOps:
AWS (EC2, S3, Lambda), Docker, Git, GitHub

CERTIFICATIONS & PROFESSIONAL TRAINING

- Machine Learning – Coursera
- Java Programming – Wipro
- Java Full Stack Development – Coursera
- Front-End Development – MYC
- React Development – Coursera

PROJECTS

Car Modernization 07/2026
Senior Software Engineer – Java Backend Developer
Contributing to the development of a modern car rental platform for **Sabre**, focused on modernizing car rental business operations through scalable backend services and microservices architecture. Building backend components and RESTful APIs using Java and Spring Boot, translating business requirements into technical solutions, and collaborating with client stakeholders and cross-functional teams. Actively involved in requirement analysis, technical discussions, API integration, and backend implementation to support maintainable and reliable application development.

KPI Metric Miner 08/2025 – 07/2026
Software Engineer – Java Full Stack Developer
Contributed to the development of an enterprise KPI management application for **PepsiCo**, designed to create, manage, and evaluate Key Performance Indicators by gathering relevant business data and supporting organizational performance measurement. Worked across frontend and backend development, implementing application features, developing RESTful APIs, and integrating frontend components with backend services. Collaborated with cross-functional teams to translate business requirements into functional software solutions and deliver a user-friendly application experience.

HM Connect 02/2025 – 07/2025
Software Engineer – Front End Developer
Contributed to the development of an internal workplace management application at **Happiest Minds Technologies**, designed to improve office space utilization and simplify employee workspace management. Played a key role in building the application from the ground up, developing user-friendly frontend interfaces that enable employees to view office floor layouts, locate available workstations, reserve desks, and book meeting rooms. Focused on delivering an intuitive user experience and supporting efficient workplace resource management.

Get In Touch 07/2022 – 08/2024

Front-End Development Intern

Contributed to the development of a user-friendly web application from the ground up, designed to connect users with products and services through a digital platform. Worked on building interactive user interfaces, developing responsive layouts, and improving the overall user experience. Gained practical experience in frontend development and translating application requirements into functional web interfaces.

DECLARATION

I hereby declare that the information furnished above is true to the best of my knowledge.
