Professional Summary

Java Backend Developer with 1+ year of experience building secure REST APIs and microservices for e-commerce platforms using Spring Boot, Spring Security (JWT), JPA/Hibernate and PostgreSQL. Experienced in API Gateway routing, validation, centralized exception handling and JUnit testing. Recognized with Best Employee of the Month and Performer of the Year awards.

Technical Skills

- **Languages:** Java, JavaScript, SQL
- **Backend:** Spring Boot, Spring MVC, Spring Security, Spring Data JPA/Hibernate, Microservices, REST APIs
- **Database**: SQL, PostgreSQL, PL/SQL (basic), MongoDB
- **Security:** JWT, role-based authorization
- **Testing:** JUnit, Unit Testing, Integration Testing, API Testing (Postman)
- **Development Tools:** Git, GitHub, Maven, Gradle, Jenkins, Jira, Swagger/OpenAPI, SLF4J
- **Frontend (working knowledge):** React, HTML, CSS

Professional Experience

Software Engineer | Java Developer *Aug 2025 – Present*

Dhatvi Business Solutions Pvt. Ltd.

- Develop and maintain secure REST APIs and microservices using Java, Spring Boot, Spring Security (JWT) and PostgreSQL for two e-commerce applications (vendor and consumer).
- Optimize the product-listing API by adding pagination and database indexing, so it returns results page by page instead of loading all products at once.
- Write JUnit unit and integration tests for core services, helping reduce regression bugs across releases.
- Collaborate with frontend, QA and product teams in Agile sprints through code reviews, debugging and release support.

Projects

1. ZestBot – Vendor Application

Technologies Used: Java, Spring Boot, Spring Security, JWT, Spring Data JPA/Hibernate, PostgreSQL, Microservices, API Gateway, JUnit, Swagger/OpenAPI, Postman
Description: Vendor-side e-commerce platform that lets sellers manage products, inventory and orders.

- Developed secure REST APIs for **product and order management** using Spring Boot, with JWT-based authentication and role authorization for vendors.
- Implemented login and security with Spring Security and JWT, so each vendor can access only their own products and orders.
- Built services within a microservices architecture, using API Gateway routing for scalability and service isolation.
- Modeled entities and repositories with Spring Data JPA/Hibernate, and designed the PostgreSQL schema with indexes and optimized queries.
- Applied layered architecture with DTOs, Bean Validation and centralized exception handling for consistent API responses.
- Added SLF4J logging and JUnit unit and integration tests; documented APIs with Swagger/OpenAPI and Postman for frontend and QA teams.

2. ZestBot – Consumer Application

Technologies Used: Java, Spring Boot, Spring Security, JWT, Spring Data JPA/Hibernate, PostgreSQL, Microservices, API Gateway, JUnit, Swagger/OpenAPI, Postman
Description: Consumer-facing e-commerce platform that lets customers browse products, place orders and track purchases through a mobile app.

- Developed REST APIs for **product browsing and order tracking** using Spring Boot, serving a mobile app.
- Implemented pagination, filtering and sorting on high-volume product listings, so customers load results page by page instead of the full catalog.
- Built order history and tracking APIs so customers can view their past orders and the status of each one.
- Implemented customer login and secure access using Spring Security and JWT.
- Designed PostgreSQL data models with Spring Data JPA/Hibernate and optimized queries for fast, consistent data access.
- Applied request validation, centralized exception handling and SLF4J logging; tested APIs with JUnit, Postman and Swagger/OpenAPI.
- Collaborated with the vendor, chatbot and frontend modules to resolve cross-service integration issues.

Education

B.Tech, Computer Science and Engineering | 2020 – 2024
Sri Sivani College of Engineering, Chilakapalem (affiliated to JNTU Vizianagaram) | CGPA: 8.11

Certifications

- Full Stack Java, Naresh i Technologies
- Programming in Java, NPTEL
- Career Edge: Young Professional, TCSiON

Awards and Recognition

- Best Employee of the Month, Dhatvi Business Solutions Pvt. Ltd.
- Performer of the Year, Dhatvi Business Solutions Pvt. Ltd. (recognized at the Anniversary Celebrations)
